

# Commercial Safes

## Get Maximum Storage Capacity

Ranging from 50 to 115 litres, and the added security of a deadlock door handle on selected models, the Kookaburra commercial safe range is stylishly designed for those seeking extra storage capacity and protection in the modern office environment.

Although a basic container can secure your valuables, it will do little to protect them from fire or theft. Safes provide an extra level of protection for documents, cash, jewellery, passports and other valuable items vital to your business and home.

Geographical weather conditions, the increased use of electrical machinery and domestic equipment and increased arson rates means that you may just be a step away from a fiery disaster.

Every Kookaburra safe has been designed for the ultimate protection and security of your valuables and important documents from fire or theft. Every safe in our range has been fire tested to International Standards (JIS1037#) and provides all the features to help keep your valuables secure and protected.

- Perfect for Office, Warehouse or Hotel use
- All Commercial Safes are Fire Resistant
- Capacity Ranges from 50 to 115 litres
